"Creating Opportunities for People"

2011 Advanced ABI Training Workshops

Every quarter a different topic in brain injury is presented through Advanced Trainings to encourage providers to expand their knowledge of the issues impacting individuals with brain injury. The training is "advanced" in that it explores one specific area in brain injury in great detail. The topics are chosen through feedback from providers. The training is free of charge and is offered to all existing A.B.I. Waiver Providers who have completed the Basic Training. Certificates will be sent to attendees by mail after completion of the training.
